

An Oral Medication for Gaining Adequate Sensual Performance With Kamagra Gold

[Erectile disorder](#) is a common condition among the males. It does not allow men to be able to gain or even maintain an erection during the sensual contact with the lady. It is one of the most common types of sensual disorder among the males. Men who are between the ages of 40 to 70 tend to struggle with it. The prevalence of this type of male sensual dysfunction is increasing every year. Millions of men all over the world struggle with erection issues. These can be mild, moderate, or severe. This condition can have a great impact on the sensual life. It is usually common among those who have existing medical conditions that need treatment. [Erectile disorder](#) can be a risk factor for a condition. A lot of men hide their illness due to the shame and even fear of talking about their sensual health. [Kamagra Gold](#) From [rsmmultilink](#) is a superb medication designed for men to deal with ED or Impotence. It holds inside it Sildenafil citrate 100 mg.

The advertisement features a romantic illustration of a man and a woman in a close embrace. On the right, there is an image of the Kamagra Gold product packaging, including a blister pack and a box. The text 'Kamagra Gold (Sildenafil Citrate 100mg)' is prominently displayed in a red oval, and a yellow 'ORDER NOW' button is positioned below it. The RSM logo is visible in the top left corner. At the bottom right, the contact number '+91 9216325377' is provided.

When a man consumes this tablet 30 minutes before the sensual interaction then it causes the blood to flow in larger quantities towards the male organ. This helps men to gain and maintain an erection instantly during sensual contact.

Relationship between Various Health Conditions And Impotence

This illness can cause great distress in the sensual life of a man and even his companion. A lot of men choose to hide their condition due to shame and even fear of their sensual health. Many times [erectile disorder](#) or ED can be a risk factor for the illness.

Heart Disease

The heart of the man is responsible for pumping the blood all through his body. If it does not function properly then the other organs will be impacted by it. Atherosclerosis is a common condition among males that causes the arteries of the man to harden. It can lead to erectile disorder in men. It makes it very hard for the blood to flow through the arteries. The blockages in the arteries are caused as a result of fatty deposits and plaque.

High Blood Pressure

High blood pressure is a common health condition among men and is also known as hypertension. It is accused when the blood pressure reading rises above 130/80 mmHg. This does not allow the heart to pump blood all over the body and even can cause damage to the arteries. A lot of men with the problem of hypertension and cardiovascular disease experience erectile disorder or poor erections during sensual contact. The problem of Hypertension might cause [erectile disorder](#) directly or indirectly. It can even damage the arteries that lead to the male organ. It can even result in various conditions that might make the male organ hard to attain or even maintain an erection.

It can lead to [erectile disorder](#) in two ways. It can harm the lining of blood vessels. It can even make them less elastic and not even fill with blood. This obstructs the flow of blood to the male organ. This makes it difficult for men to gain an erection during the lovemaking activity.

Sensually Transmitted Infections (STIs)

A lot of men with an active sensual history might suffer from [sexually transmitted Infections](#) (STIs). These cause problems in the prostate gland. This inhibits a man from acquiring and maintaining an erection during sensual contact.

Some STIs that can lead to erectile disorder might include:

- Gonorrhoea
- Chlamydia
- HIV
- Hepatitis
- Diabetes

As per recent reports, there is a strong link between [erectile disorder](#) and diabetes. Men with Type 2 diabetes are at a greater risk of struggling with erection issues. This illness harms the autonomic nervous system (ANS). This problem arises in the widening and constricting of blood vessels. Many times high blood sugar levels can lead to vascular and neuropathic issues.
