How does The Muscle Maximizer work?

The short answer is The Muscle Maximizer uses a 3 phase approach to promoting lean muscle growth by fully customizing your nutrition and training regimen to help naturally maximize your anabolic hormones. The Muscle Maximizer provides a unique nutritional software that is designed to tailor optimum muscle-building nutrition to you based on individual factors such as your age, weight, height, true body type and workout schedule. Calories and macronutrients are specifically allocated throughout the day to perfectly complement your customized training program that you'll be provided. On the days you're not training,

your nutrition is structured to help repair and rebuild broken down muscle tissue quickly and effectively. The Muscle Maximizer is designed to give your body what it needs, when it needs it, in order to promote lean muscle growth and accelerate muscle recovery. For more information watch the video above.

What if I don't know my true body type?

Don't worry, not many guys do, and this is a huge reason why the generic nutrition and workout programs they're following ultimately fail or lead to frustrating plateaus. However, with The Muscle Maximizer you will learn exactly how to determine your true body type right away during phase 1 of the program. I think you'll find it pretty cool!
