## **About the Author**

The Wealth Signal was created by Dr. Steve Newton, a renowned neuroscientist dedicated to bridging the gap between science and personal development.

Inspired by cutting edge research and transformative encounters, Dr. Newton crafted this program to make advanced manifestation techniques accessible to all.

Dr. Newton's method leverages the same principles of creativity, relaxation, and problem solving used by successful individuals worldwide. By integrating neuroscience with a 3,300 year old Hindu tradition, he has created a system that helps people activate their "third eye" to achieve financial breakthroughs.

## **How Does It Work?**

The Wealth Signal operates by harnessing the power of alpha brainwaves, which are closely associated with creativity, focus, and relaxation. Using a scientifically designed 9word script, participants stimulate their thalamus, often referred to as the "third eye," to unlock neural pathways for wealth attraction.

Unlike traditional manifestation practices, which rely on visualization, this program directly addresses "neural rigidity" caused by stress and anxiety. By calming overactive beta waves and activating alpha brainwaves, The Wealth Signal fosters a relaxed state that invites opportunities and financial breakthroughs.

Supported by research from institutions like Boston University and Stanford University, the program offers a practical and scientifically validated approach to achieving financial success.
