

A Remedy to Lead a Great Sensual Life With Silvitra 120mg

Silvitra 120 is a therapeutic agent prescribed to solve [erectile dysfunction](#) in men. It combines two active ingredients: [Sildenafil Citrate 100mg](#) and [Vardenafil 20mg](#). [Sildenafil Citrate](#) is widely recognized as a PDE5 inhibitor, whereas [Vardenafil](#) is in the same class of pills. They exert their effects together to boost the force of arterial blood flow toward the genital area, and thus, men can reach and maintain an erection during sensual arousal.
