Types of [Female Sensual Dysfunction](#) or [Female Impotence](#)

[Female sensual dysfunction](#) can be categorised into various categories. These might vary the sensual interest of the women and even the arousal process. These impact the ability of a female to gain orgasm and even suffer from sensual pain disorders.

Sensual interest and sensual arousal

[Female sensual dysfunction](#) is categorised into various types. These might include:

- Female hypoactive sensual desire disorder (HSDD),
- Female sensual arousal disorder (FSAD), and
- Female sensual interest/arousal disorder (FSAID).

[Hypoactive sensual desire disorder](#) (HSDD) is a type of sensual disorder that causes a man to experience low sensual desire during sensual contact. It is the constant inability to gain and even preserve genital arousal in a consistent way. A man does not gain arousal even in the

presence of adequate sensual stimulation. [Buy Pink Lady 100 mg online](#) that is an outstanding medication to deal with female sensual dysfunction. It encompasses [Sildenafil citrate 100 mg](#).

[Female orgasmic disorders](#)

It is the most common type of [sensual disorder in women](#). It is defined as the inability to gain or reach an orgasm during sensual contact. Orgasm is a type of sensual pleasure that is gained as a result of a physiologic reaction.

An orgasm is also combined with involuntary rhythmic contractions of the pelvis, and it also causes a reduction in the sensually induced vasocongestion levels. These are used to increase activation within the paraventricular nucleus of the hypothalamus.

Sensual pain

There are various types of disorders that are linked to sensual pain. These might include dyspareunia, vaginismus, vestibulodynia, and vulvodynia. These disorders might lead to pain in the genitals during sensual contact. A lot of young women tend to suffer from sensual disorders.

Vaginismus

This is a type of [sensual dysfunction](#) that might cause involuntary spasm and/or tension of the muscles in the perineal and levator. This might make the penetration more difficult or even impossible.
