

**Introducing The Optimal Choice for
Composite Deck Framing**

www.cevisco.com.au

Why Choose Cevisco for Steel Truss Engineering?

Cevisco is a leading provider of steel truss engineering solutions tailored to meet our client's specific needs. Our team of experienced engineers utilises state-of-the-art technology and innovative techniques to ensure the highest quality standards in design, fabrication, and installation.

Composite deck framing refers to the substructure or frame that supports the decking boards. Traditionally, timber has been used for deck framing, but it has several drawbacks compared to our revolutionary outdoor deck flooring.

Durability That Defies Nature's Elements

One of the most significant advantages of our Cevisco-Frame decking over traditional timber decking subframes is its unparalleled durability. When exposed to moisture or frost, timber is inherently vulnerable to rotting, splintering, and warping. Our steel deck frame remains intact and unaffected by seasonal temperature fluctuations, excessive water, or frost.

Benefits of Using Cevisco-Frame for Composite Deck Framing

1. Structural Strength

Cevisco-Frame is made from high-quality galvanised steel, providing superior structural strength compared to traditional timber frames. This makes it an ideal choice for decks with heavy loads or in areas prone to extreme weather conditions.

2. Versatility

Our steel deck frame can be customised to fit any shape or size, making it suitable for various deck designs. It also allows for easy installation of features such as stairs, pergolas, and railing systems.

3. Longevity

Due to its superior durability, Cevisco-Frame has a longer lifespan than traditional timber frames, providing you with years of reliable service without frequent maintenance or repairs.

4. Cost-Effectiveness

Although the initial cost may be slightly higher than timber, Cevisco-Frame is more cost-effective in the long run due to its longevity and minimal maintenance requirements.

5. Environmentally Friendly

Steel is a sustainable and recyclable material, making Cevisco-Frame an environmentally friendly choice for your composite deck framing needs.

Contact us today to learn more about our outdoor deck flooring solutions and how we can help bring your decking vision to life.
